Profile

M.A. student in Data Analysis & Decision-Making – International Management with hands-on experience using data, analytics, and automation to solve practical business problems. Experienced in exploring structured business and digital data, spotting inconsistencies and turning them into concrete improvement points, building dashboards and reporting solutions, defining meaningful KPIs, and translating analytical findings into actionable recommendations for business stakeholders. Built and operationalized more than 120 automated reports across seven business functions, supported data-driven decision-making for a network of 287 dealers, and currently develop Power BI and Matomo analytics workflows at thyssenkrupp Uhde. Hands-on with Python, Pandas, Jupyter Notebooks, and SQL for exploratory analysis, data cleaning, and structured business analysis. Approaches AI as a force multiplier for analytics and automation, using evolving tools thoughtfully and with appropriate guardrails.

Professional Experience

thyssenkrupp Uhde GmbH | Dortmund, Germany **03/2026 – Present**

Working Student – Corporate Communications & Data / AI Solutions

- Analyze digital communication and website data using Matomo and Power BI, transforming raw traffic and engagement data into interpretable performance insights for stakeholders.
- Develop dashboards and reporting structures around recurring business questions and key performance indicators, moving reporting beyond descriptive traffic counts toward decision-relevant analysis.
- Identify patterns, inconsistencies, and recurring process issues across communication data and workflows and translate findings into concrete improvement opportunities.
- Work with business stakeholders to define analytical requirements, structure data-related questions, document projects, and communicate findings in a clear, decision-oriented format.
- Prototype AI- and automation-enabled solutions using Microsoft Azure, Copilot Studio, LLMs, structured data, and reusable workflows to improve analytics, knowledge management, and recurring business processes.
- Structure fragmented information and source data into reusable, machine-readable datasets and knowledge resources that support automated analysis and retrieval.
- Extend a constrained corporate CMS during website migration by prototyping reusable HTML, CSS, and JavaScript components when existing tools cannot meet business requirements.

Çamsan Ordu A.Ş. | Ordu, Türkiye **05/2023 – 02/2026**

Design, Brand & Marketing Manager

- Led a cross-functional data and process transformation serving 287 dealers, translating business needs across management, sales, IT, marketing, and operations into structured digital workflows.
- Designed and implemented CRM-supported customer, sales, and marketing processes using Odoo and SAP, replacing fragmented manual activities with structured and repeatable data workflows.
- Built and operationalized more than 120 automated reports across seven business functions, improving data visibility, KPI monitoring, decision support, and day-to-day execution.
- Analyzed customer, market, sales, and digital-performance data to uncover patterns, test assumptions, and support product, marketing, innovation, and business-development decisions.
- Used Google Analytics, R, and structured business datasets for exploratory analysis, performance evaluation, and management reporting.
- Identified data-quality and process inconsistencies across reporting workflows and coordinated improvements with business and IT stakeholders.
- Prepared business analyses, project documentation, management presentations, and structured reporting outputs for senior stakeholders and cross-functional teams.
- Managed analytical and digital initiatives iteratively from initial business question through exploration, implementation, measurement, and refinement.

Ordu Metropolitan Municipality | Ordu, Türkiye **08/2020 – 05/2023**

Senior Architect

- Led 20+ public infrastructure and urban-development projects, coordinating multidisciplinary teams, external partners, and public-sector stakeholders.
- Structured complex and often ambiguous information into measurable requirements, actionable project plans, and decision-support materials for technical and nontechnical stakeholders.

ARTITECH Architecture | Istanbul, Türkiye **01/2017 – 08/2020**

Co-Founder / Architect

- Co-founded and operated an architecture studio, managing client requirements, project data, delivery, and solution presentations across multiple concurrent workstreams. Planned and delivered architecture and interior-design projects totaling more than 50,000 m².

Selected Data & AI Projects

AI-Powered Language Learning Dataset *Python · Pandas · Local LLMs · Data Enrichment*

- Built and structured a dataset of approximately 3,500 German vocabulary entries for a real-world language-learning use case, automating English and Turkish translation with Python and preparing the data for large-scale enrichment.
- Used locally hosted Ollama models to enrich entries with example sentences, grammar attributes, word types, semantic tags, word families, and derivational relationships.
- Identified and corrected data inconsistencies through iterative exploration, improving dataset quality and turning recurring issues into concrete data-cleaning rules.
- Structured vocabulary as an interconnected dataset rather than isolated flashcards and turned the enriched data into a working personal web application using Python, RStudio, VS Code, and web technologies.

Communication Performance Analytics *Power BI · Matomo · KPI Analysis · Data Visualization*

- Built an analytical layer combining website and communication data to surface meaningful performance patterns and support recurring stakeholder questions.
- Designed KPI-oriented reporting that turns descriptive traffic data into interpretable performance signals and decision-relevant insights.

Business Reporting & Process Analytics *Odoo · SAP · Automated Reporting · Business Intelligence*

- Built and operationalized more than 120 automated reports across seven business functions within a manufacturing organization supporting a 287-dealer network.
- Structured recurring reporting around operational and management questions, improving transparency, identifying process issues, and enabling more data-driven decisions.

Personal AI Data & Context System *Python · Structured Data · QMD · Automation · LLMs*

- Built a locally managed structured-data environment connecting projects, decisions, tasks, and notes through metadata and machine-readable relationships.
- Developed automated hooks and retrieval workflows that allow AI systems to operate on persistent structured context rather than isolated prompts, using AI as a scalable support layer with deliberate human oversight and guardrails.

Education

Data Analysis & Decision-Making – International Management, M.A. **03/2026 – expected 03/2028**

Hochschule Fresenius, Cologne – Full-time Master's Program

Currently enrolled at a German university; focus on data-driven decision-making, business analytics, and quantitative analysis.

B.Arch. Architecture **2011 – 2016**

Istanbul Technical University (ITU)

Skills & Languages & Interests

Programming & Data Analysis: Python · Pandas · Jupyter Notebooks · SQL · R / RStudio · Data Cleaning · Exploratory Data Analysis · Data Transformation

Business Intelligence & Visualization: Power BI · Matomo · Google Analytics · Excel · KPI Reporting · Dashboard Development · Data Visualization

Data & Product Analysis: Business Analysis · Product Insights · KPI Definition · Data Quality · Pattern Detection · Performance Analysis · Requirements Analysis · Project Documentation

AI & Automation: LLMs · Microsoft Azure · Microsoft Copilot Studio · n8n · AI-assisted Analytics · Workflow Automation · Structured Data Workflows · Power Automate

Technical Tools: Git · GitHub · Visual Studio Code · HTML / CSS / JavaScript · Markdown / Quarto / QMD

Languages: Turkish – Native · English – C1 (certified) · German – B1 (currently progressing toward B2)

Interests: Applied Data Science • Travel & Exploring New Cultures • Bachata National Champion, Türkiye • Music Production (FL Studio)
